

All campers and their families are notified of the following:

Per CDC guidelines, attending Oscar's Teen MS Camp or Oscar's Young Adult Retreat is considered high risk, because our campers come from separate geographical locations. We have established a mitigation plan to reduce the spread of COVID19 including requiring all campers, staff, and volunteers to be fully vaccinated against COVID19 (ideally), or present a negative COVID test within 48 hours of arriving at camp. **Knowing the following plans are in place and will be followed, campers/parents will not hold Oscar the MS Monkey or UWRF responsible in the event of COVID illness.**

- **Do you have at least one campus designee that serves as a liaison between the program and the UW-System Institution?**

Our liaison between Oscar's Teen MS Camp and the UW-System Institution is Emily Blosberg
651-233-4636

- **Do you have at least one designee in your program to whom parents, campers, and staff can go if they have questions regarding the program for which your camper is registered, as it relates to COVID-19?**

Both Andrea Blosberg 651-208-3999 and Emily Blosberg 651-233-4636 may be contacted with questions regarding Oscar's Teen MS Camp, and Oscar's Young Adult Retreat as it relates to COVID-19

- **How do you inform participants, parents, and staff of existing and new protocols?**

Our mitigation plan is included in the camp registration packet. If new protocols are established after the camp registration packet is published, that information will be found on our website (www.mroscarmonkey.org), will be communicated through email, and an updated version of the registration packet will be published.

- **What is your communicable disease protocol plan?**

- Prior to Camp:

- Ask campers/staff arrive healthy
- Collect/review health history
- Order supply of PPE (gloves, masks, sanitizers, cleaners)
- Require proof of vaccination OR follow testing protocol (See "What are your daily COVID-19 testing protocols)

- During Camp:

- Orient staff/campers to illness-reducing strategies
- Conduct daily health screenings

- Intervention During Camp:

- Identify symptoms and illness as soon as possible
- Contact support services needed (food services, isolation dorm, communicate with parent/guardian)

- After Camp

- Receive COVID tests results from those not vaccinated against COVID19, and communicate to camp families of any known COVID cases

- **What are your daily Covid-19 Testing Protocols?**

- All campers and staff who are fully vaccinated must show proof of vaccination
- Those who are not vaccinated:
 - must self-quarantine for 14 days before coming to camp
 - must present a negative COVID test 48 hours prior to arriving at camp
 - will be screened throughout the camp program
 - must get tested for COVID 3-5 days after returning home.

Each day, all campers, staff, and contractors will have their temperature taken, and screened for common COVID symptoms. If they present 2 out of the 5 symptoms (fever, cough, sore throat, loss of taste/smell, difficulty breathing), they will be moved to the isolation dorm, and transportation home will be arranged with their parent/guardian within 24 hours.

- **What is your sanitization plan for before, after, and during programming? Who will you assign to do said tasks? Will participants be asked to sanitize items themselves?**
 - All areas will be cleaned and sanitized after each group activity, and at the end of the day.
 - We will use disinfecting products on surfaces including door knobs, table tops, chairs, faucets, etc.
 - Bathrooms will be cleaned daily, and campers will be assigned to one restroom.
 - Snacks will be individually wrapped items.

- **What PPE and cleaning products will you use?**

All campers, staff, volunteers, and outside contractors will be required to wear a face mask during camp activities, transportation, and when around other campers. Hand washing will be required before and after every scheduled activity (activities, meals, free time, etc.). Additionally, hand sanitizer will be available throughout every day.

Door handles, faucets, and other surfaces will be sanitized at the beginning/middle/end of the day. Games, and other materials will be sanitized appropriately before and after each use. Products used may include Clorox, Mrs Myers, Lysol, and Bleach.

Staff handling food and snacks will wash hands and then put on clean gloves to distribute food packages.

- **What is your participant, staff, and contractor screening protocol plan?**

Each day, all campers, staff, and contractors will have their temperature taken, and screened for common COVID symptoms. If they present 2 out of the 5 symptoms (fever, cough, sore throat, loss of taste/smell, difficulty breathing), they will be moved to the isolation dorm, and transportation home will be arranged with their parent/guardian within 24 hours. If staff are local, they will be sent home.

- **How will you communicate mask mandates to participants, staff, parents, and contractors?**

All campers, staff, volunteers, contractors, and any other persons associated with Oscar's Teen MS Camp and Oscar's Young Adult Retreat will be required to properly wear a face mask unless in a room alone, eating, or sleeping. Extra face masks will be provided.

- **What is your grouping and staffing plan to limit transmission?**
 - Campers/staff will be assigned to the bathrooms in their respective dorm hallway.
 - Campers/staff will be assigned a vehicle for transportation to/from field trips.

- **What is your plan for participant drop-off and pick-up?**

Check-in for camp will be done outside. Camp mentors (counselors) will assist in bringing campers belongings to their assigned room. On departure day, campers' belongings will be brought outside so when their ride arrives, they will not need to go into the building. Parents will not be allowed into the building at drop-off or pick-up. Parents and campers must plan their good-byes at the door.

- **How will you keep track of who is allowed to pick up each participant?**

The registration packet has a section that requires parents to detail their drop-off and pick-up plans, which include individuals with whom the camper should go at the end of camp. Those details include airline information or personal arrival information, if coming by car. Those plans will be clearly defined before camp arrival day.

- **What is your plan for performing an initial health screening upon participant arrival?**

Upon arrival to camp, campers and staff must present proof of vaccination, or a negative COVID test, conducted 48 hours prior to camp arrival. Additionally, temperatures and symptom screening will be conducted before bringing their belongings to their room.

- **Does your campus have an escalation matrix that will determine the continuation of operation in the case of confirmed COVID-19 cases?**

If more than 3 campers, staff, or a combination of campers and staff, are determined to need to be quarantined because of Covid-19 related symptoms OR if there is one confirmed case of Covid-19 within the camp community, camp will come to an end and all campers and staff will need to vacate the dormitory and return to their home within 24 hours. Campers will be placed in quarantine in their respective dorm rooms until travel arrangements have been secured.

By signing below, I agree to the above mitigation plan, designed to reduce the spread of COVID19 during Oscar's Teen MS Camp. I/my child will abide by the above policies and procedures. If not, I/my child will be sent home at my own expense.
